OBJECTIVE

Acting in the development / analysis of PHP systems, database, requirements survey and agile methods.

ABOUT ME

I am Brazilian, professional with more than 6 years of experience in software development. For a number of years i've been working on the study and application of S.O.L.I.D./GRASP principles and code refactoring, more recently i'm dedicated to the study of Domain-Driven design which was also the subject of my graduation work.

ACADEMIC EDUCATION

2014 – 2016

Postgraduate
UniRitter

Information Systems with Agile Methods

Main topics: Agile Development Practices, Design Patterns, Smells and Refactoring, Web Architectures, Agile Software Testing, Project Management, Agile Coaching and Mentoring. Article Title: "Aplicação de Domain-Driven Design no Gerenciamento de GRU de Cronotacógrafo no Inmetro/RS".

<https://github.com/tofarias/artigo-ddd/blob/master/artigo/artigo-domain-driven-design.pdf>

Advisor: M.e. Guilherme Silva de Lacerda.

Adress: Rua Orfanotrófio, 555 - Alto Petrópolis, Porto Alegre/RS, Brazil

2010 – 2013

Graduation
Faculdades QI

Systems Analysis and Development

Main topics: Web Services, Project Management, Software Security, Software Engineering, Java Development O.O.

Adress: Av. Julho de Castilhos, 435 - Centro, Porto Alegre/RS, Brazil

2008 – 2010

Certificate
Programs
Faculdade QI

Computer Technician

Volunteer Work

Monitoring in the discipline of Algorithms and Programming

EXPERIENCE

PHP Programmer

Focused on the development of REST APIs following the JsonApi.org specification. Develops with the framework Lumen (Laravel) and Doctrine. Acts in the "Easy Train" project "gamification" software. Responsible for applying integration and deploy tests with the Jenkins tool and load tests with JMeter.

PHP Programmer

Acting in clientes projects at John Deere's bank.

PHP Analyst / Programmer

Allocated in the Inmetro client (federal agency). Mainly works with the PHP language (CakePHP) and Oracle database in the Chronotachograph project. Performed from requirement survey through user interviews to impact analysis along with database administrators.

Systems Analyst

I worked on the development of an internal web system that aims to manage contracts and invoices of works. The invoice module is loaded with information from the database (SQL Server) managed by the TOTVS system: RM and Flows. Developed with PHP (Laravel), TDD, Git, in linux environment along with MySql database.

PHP Programmer

I worked mainly with the PHP language. Responsible for developing

(TECHNOLOGY COMPANY)	solutions for the Qualitor product and its modules. Performed requirements analysis, project documentation, TDD development.
05/2012 – 12/2012 EMATER / ASCAR (STATE AGENCY)	Computer Technician Ingressou mediante concurso público, atuando na manutenção de computadores nos escritórios municipais. Eventualmente desenvolveu programas em Java para auxiliar nas demandas do setor.
05/2011 – 04/2012 CWI (TECHNOLOGY COMPANY)	Programmer PHP / .Net In April / 2011, the CWI Software project, which took place in São Leopoldo, was developed in the "Crescer" project. The 2-month training involved the following technologies: SQL Server 2008, ASP.Net, C Sharp, Java Web. With the end of "Crescer" project I continued in the company as a trainee working on technical support at São Leopoldo headquarters with PHP / Zend Framework for client "TUV Rheinland" and CodeIgniter for Terra client, I was transferred to the unit in Porto Alegre joining the client project "Odebrecht", using dotNet technologies MVC and PL / SQL, then joined the development team for SENAC / RS client in the project to develop the company's intranet using dotNET MVC and SqlServer 2008.
